Taxonomy

Software Improvement Group

Seeds

- SARA: software written without (energy-)efficiency in mind can be highly wasteful
- Green Coding: Rabobank, TNO, CapGemini, ...
- ICT~Office: multi-year agreements (MJA3)
- Green IT consortium region Amsterdam: green ICT infrastructure
- VU: Green IT metrics, service greenery, green strategies, ...
- SIG: scan application software to find opportunities for reducing energy consumption

Preliminaries

- Workshops “Green Software” at VU and “Green Software Architecture” at CWI
- Survey “Green Software Awareness”

Now: bring separate initiatives together for synergy and consolidation

- Request by AgentschapNL of Ministry ELI.

Mission

- Facilitate the creation and exchange of knowledge regarding green software

Mode of operation

- Workshops
- Mailing list
- Social networks (LinkedIn, Twitter, ...)
- Dissemination (Interview Telegraaf, survey results in AG, presentation at ICTDelta, ...)

How can you participate?

- Share your knowledge and experience
- Submit your questions and challenges
- Provide case study environment
- Form research alliances

A start has been made ...
